### SUMMARY

Highly passionate self-taught frontend developer with 1+ year of experience creating seamless user experiences and solving complex problems through elegant web development solutions. Proficient in HTML, CSS, JavaScript, and React, with a strong focus on collaborative teamwork and effective communication. Seeking an entry-level role to further develop my skills and knowledge, while contributing to the team success.

### PROJECT EXPERIENCE

---

**Interactive comment section** | <https://interactive-comment-section-auf.netlify.app>

Feb, 2022

- Utilized the challenge offered by Frontend Mentor to develop an interactive comment section, showcasing my proficiency in building advanced features like reply, send, delete, upvotes, downvotes and sorting of posts based on post time and votes, using React JS and state management through React Context..

**Countries data with theme toggler** | <https://aufrestcountriesapi.netlify.app>

June, 2022

- Using restcountries api, Implement features such as countries data display, search and filter countries by region.
- Created a dynamic user experience by implementing an auto-select theme option based on device choices that could also be changed manually.

**Auffur Furniture Website** | <https://auffur-furnishes.netlify.app>

Feb, 2023

- Developed an e-commerce website to demonstrate expertise in the MERN stack by implementing client and server side functionalities so as to ensure seamless user experience.
- Implemented essential features such as cart management, user authentication, an admin panel, and database management using ReactJS, MongooseJS, ExpressJS, and Redux Toolkit for state management.
